

Homework

1) Jerry is six years older than Nathan. The sum of their ages is 12. Find all their ages from youngest to oldest.

2) Blake is two times as old as Lilly. Jasmine is four years younger than Lilly. The sum of their ages is 24. Find all their ages from youngest to oldest.

3) Tara is twice as old as Gwen. Their sister, Amy, is 5 years older than Gwen. If the sum of their ages is 29 years, find each of their ages.

4) Noah is sixteen less than nine times as old as Kenneth. The difference of their ages is 64. Find their ages.
