

## Slope Formula

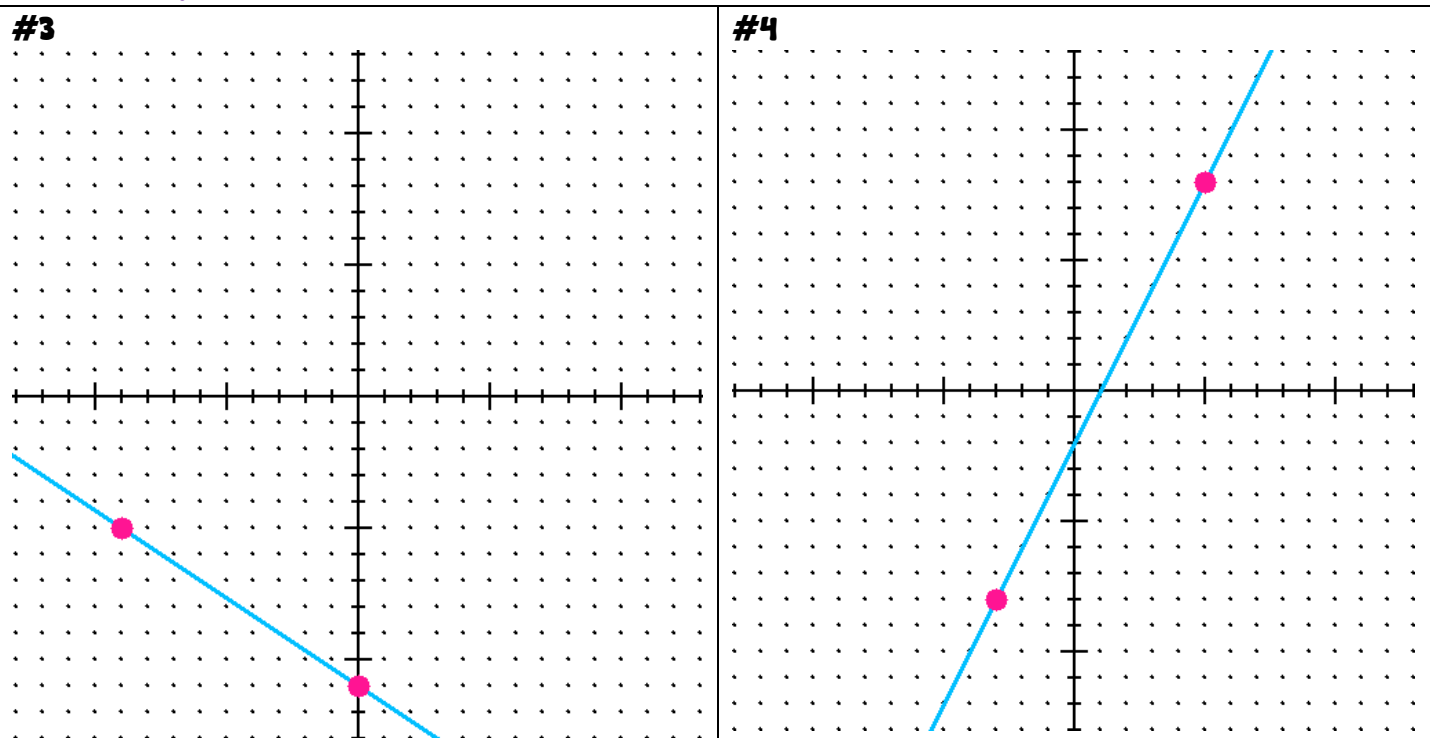

Find the **Common Difference**.

#1

x	1	2	3	4	5	6	7	8	9
y	7								64

#2

x	2	....	10
y	-5	....	-9

Find the **Slope** of each Line.Without graphing find the **slope** between the points using the **Slope Formula**.

5) (4, 3) and (-2, 6)	6) (-2, 3) and (8, 1)
7) (1, -5) and (-3, 7)	8) (-4, -8) and (-19, 1)
9) (-19, -20) and (17, 4)	10) (-21, -5) and (-18, -14)
