We can find **SLOPE** without graphing using this formula:

$$m = \frac{y_2 - y_1}{x_2 - x_1}$$

Slope Formula WAY

Find the Slope between the given points.

1) $(-5,-4)\ (-8,2)$

2) $(7,-1)\ (-5,2)$

3) $(12,5)\ (12,-7)$

4) $(25,10)\ (-20,-11)$
